NSR-Esign v1.0.0

Place a signature image and a Place/Date/Time stamp onto a PDF, entirely on your own computer - no account needed.

Two location buttons are optional, only run when clicked, and only work if this computer currently has internet access:

- 'Detect Location & Time (Internet)' looks up an approximate location and a verified time from your public IP address.
- 'Get Exact GPS via Browser' briefly opens your web browser to ask it for the device's exact GPS coordinates, then brings the result back here.

Without internet access, or if you don't click either button, everything works exactly as before using manual entry and this computer's own clock.

Built with Python, Tkinter and PyMuPDF.
